Dental Implants and the Edentulous Population

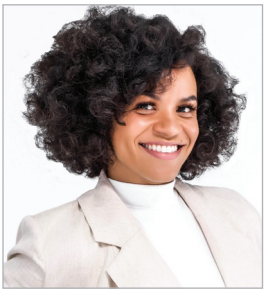
According to the College of Prosthodontics, more than 26 million Americans are edentulous, with approximately 23 million being completely edentulous. Countless studies state that the impact of edentulism on oral and general health can lead to impairment, functional limitation, physical, psychological, and social disability. Dental implants have become the standard of care to replace missing teeth, expanding the treatment options for delivering dental care to the edentulous population. This program will provide dental professionals with a comprehensive knowledge base of implant dentistry as it pertains to the edentulous population to help identify candidates for full arch rehabilitation and successful long-term treatment outcomes.

Educational Objectives:

- List and define the fundamentals of implant dentistry.
- Identify full arch treatment solutions and prosthetic designs.
- Recognize complications involving multiple and full arch cases.
- Compare and contrast treatment modalities for edentulous patients.
- Discuss strategies to maintain complex implant restorations.

Tuesday, March 15 | **6:00 to 9:00 pm**

THIS IS A VIRTUAL EVENT
ZOOM LINKS WILL BE SENT ONE DAY PRIOR TO THE COURSE



SHAVONNE R. HEALY, MSDH, RDH

Shavonne is a member of the Association of Dental Implant Auxiliaries, International Federation of Dental Hygienists, serves as delegate for the American Dental Hygienists' Association and Immediate Past President of the District of Columbia Dental Hygienists' Association. She is the co-founder of RDH Innovations and Dental Implants Uncovered Facebook Study Group, as well as the founder of A Higher Learning. Shavonne was recently celebrated as one of Dimension of Dental Hygiene's Top 6 Dental Hygienists You Should Know for Clinical Practice. With a background as Implant Care Practitioner in Oral Surgery, Shavonne has cultivated a pathway for dental hygienists to work intra-professionally alongside Oral and Maxillofacial Surgeons.

This course qualifies for 3 CE Credits
