

# SMILE COMPLETE FULL-ARCH HYBRID TREATMENT

## Simplifying a Complex Procedure

Full-arch treatment has improved the quality of life for thousands of patients over the past several years. Smile Complete has taken what was previously considered a complex, time-consuming procedure and has simplified the entire process, utilizing advanced technology and new treatment protocols, to enable more patients to benefit from this beneficial procedure.

### **PART I: Case Selection and Treatment Planning**

**Monday, October 7 from 6:00 to 9:00 PM**

- Case Selection, Case Set-up, and Prosthetic Selection
- Treatment Planning and Presentation
- Patient Expectations, Answering Patients' Questions

### **PART II: Smile Complete Protocol Start to Finish**

**Monday, November 4 from 6:00 to 9:00 PM**

- Digital Workflow, Photogrammetry, Surgical Procedures
- Healing Hybrid, Final Impressions, Final Prosthetic
- Managing the Hybrid

**CEU: 3 CEU will be provided for each meeting**

#### **SPEAKER:**

Over the past decade, Dr. Ted Kozlowski has gained extensive experience with full-arch, implant supported, fixed hybrid prosthetics. He values collaboration between the general dentist and oral surgeon and appreciates the impact that new technology provides to make full arch restorations for patients in an environment that is predictable with efficient results for both the provider and the patient. Dr. Kozlowski's expertise has enabled him to develop tips and tricks from case presentation to expectations for the treatment process to successfully complete complex cases, which he will share with course participants.

**LOCATION:** Both meetings will be held at Vito Ristorante 10249 York Road, Cockeysville

*If you have any questions or wish to register for this course, please visit our education website [www.mdcentereducation.com](http://www.mdcentereducation.com) or contact our Director of Professional Relations, **Akiya Eason**.*
